

Density-flow tank design

Jim Trexler, DGSE, 7/27/05
UNR: 784-1504

- Specifications:
- > Build two (2) identical tanks.
 - > The tank is designed to be used filled with water to the overflow pipe. All seams need to be water-tight.
 - > All sides of the tank are clear. The bottom should be white.
 - > The ramp (shaded in the drawing) is clear, with 10cm spaced ruled lines as shown. The lines should be ruled on the underside, so that the top is smooth.
