Geology, Earth Science, and Environmental Sciences at California State University Long Beach

Want to make a difference with real knowledge? Real skills? Real jobs? Want to be able to do more than talk when you finish college?

Learn how to map, describe, and analyze the physical, chemical, and biological worlds.

Learn to write clearly, concisely, professionally, and present with a compelling style & logic.

Global warming?
Environmental change?
Renewable & nonrenewable resources
Is it safe to live here?
Is it safe to build here?
Ocean circulation?
Greenhouse gases?
Increased hurricane?
Eroding coastlines?

Geology & Earth Science degrees will give you the BROADEST education in all the sciences, plus an appreciation for the Earth and ocean.

Nearly every student who majors in Geology gets a job in the field, if they want one. Others go on to be teachers, lawyers, doctors, dentists, parents, businesspersons, etc.
