Fostering Effective Geoscience Teaching
Cathryn A. Manduca, Sean Fox, John McDaris and Ellen Iverson
Science Education Resource Center, Carleton College

The Science Education Resource Center is engaged in several projects aimed at motivating change in faculty classroom practice by sharing ideas, methods and materials. On the Cutting Edge: Workshops for Geoscience Faculty helps faculty stay up-to-date with research and teaching methods. Starting Point: Teaching Introductory Geoscience provides digital libraries resources within a pedagogically focused website.

Starting Point: Teaching Introductory Geoscience
http://serc.carleton.edu/introgeo/

A website providing concrete pedagogic advice for faculty teaching entry-level geoscience courses.

Teaching methods are outlined from a Geoscience perspective.....

......and reinforced with classroom-ready example activities.

On the Cutting Edge: Workshops for Geoscience Faculty
http://serc.carleton.edu/NAGTWorkshops/

Face-to-Face workshops act as a catalyst for the development of online professional development resources...

...such as detailed program guides

...and a variety of online resource collections.
