

YOUNG VOICES ON CLIMATE CHANGE
Youth Solutions to the Global Warming Crisis

ABOUT US MOVIES FOR KIDS FOR TEACHERS GET INVOLVED LINKS

LEARN HOW YOU CAN HELP STOP GLOBAL WARMING

OUR MISSION
Young Voices on Climate Change is a film series featuring young people who are making a difference! They are shrinking the carbon footprint of their homes, schools and communities. You, too, can do something about global warming! As Alec Loorz says, "Kids Have Power."

Be inspired by these seven Inspiring and Empowering Films about Youth Climate Change Solutions

Watch them at YoungVoicesonClimateChange.com

The *Young Voices on Climate Change* films present positive success stories of young people finding climate change solutions—win-win scenarios—reducing CO2 emissions in their homes, schools and communities and helping their parents understand *that reducing CO2 is in their economic interest.*

Dreaming in Green features four Florida girls who conducted an energy audit and reduced their school's energy consumption, emissions—and their electric bill by \$53,000.

Kids vs Global Warming features Alec Loorz and his imatter and other campaigns.

Team Marine successfully bans plastic bags in their city of Santa Monica.

Plant for the Planet features 11-year old Felix Finkbeiner who plants a million trees.

Replicate these and the other projects in the films by starting or joining a CO2-Reduction Club! For more information contact Lynne Cherry or Margi at YoungVoicesForThePlanet@gmail.com. You can purchase a DVD containing all the films and learn more about them at YoungVoicesonClimateChange.com.
