

CLIMATE CHANGE EDUCATION FOR FUTURE BUSINESS LEADERS

A Workshop hosted by the Climate Change Education Roundtable of the National Research Council

When: Thursday, March 14, 2013
Time: 8:00 AM – 5:00 PM

Where: The National Academy of Sciences
2101 Constitution Avenue, NW
Washington, DC

The National Research Council's Climate Change Education Roundtable presents a workshop that brings together leaders in industry and business education to discuss effective models for incorporating climate change education in business schools. Climate change is increasingly viewed as a key strategic issue posing both risks and opportunities for the private sector. In this workshop, leaders in business schools and the private sector that heavily recruit from MBA programs will be challenged to think about how business schools can prepare future leaders that understand the risks and opportunities inherent in a changing climate.

The workshop's steering committee includes:

Janet Peace (Chair), Center for Climate
and Energy Solutions
Stefan Heck, McKinsey & Company
Andrew Hoffman, University of Michigan
Mark Proegler, BP
Bruce Schlein, Citigroup
Anant Sundaram, Dartmouth College
Richard Vietor, Harvard University
