## PRE-COLLEGE SUMMER SUSTAINABILITY PROGRAM SUMMER 2013

June 15-22 & June 25-July 2

### OVERVIEW

The School of Global Environmental Sustainability Pre-College Summer Sustainability Program offers high achieving high school students an unparalleled opportunity to work with professors and graduate students from some of the top ranked programs and departments in the world.

Whether the day finds students rafting the Poudre River, visiting the cutting-edge Colorado State University wind tunnel, or hiking through Rocky Mountain National Park, students will find themselves emersed in sustainable education.

Each day of the Program will add another piece to the sustainability puzzle. Whether we are on the Pawnee National Grassland with pronghorn and prairie dogs, high in the Rocky Mountains investigating wildfire and ecosystem health, or discovering Old Town Fort Collins, our goal is to help you connect the dots between ecosystems, our society, and the economy. The Program empowers students with a foundational understanding of sustainability that increases their capacity to think of creative solutions and get involved in their community.

Mentorship is a core goal of the Summer Sustainability Program. Get a jumpstart on your college career and join us this summer!

### CURRICULUM

Our 8-day summer residential program highlights six focal areas of sustainability:

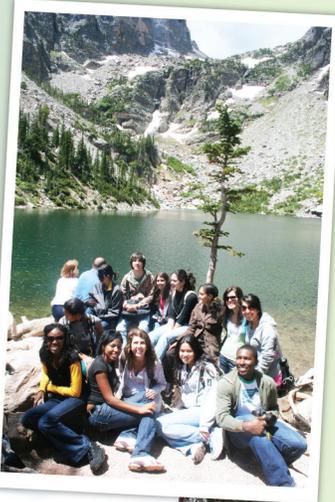

- Energy and Climate
- Food Security
- Environmental Institutions and Governance
- Sustainable Communities
- Land and Water Resources
- Biodiversity Conservation and Management

Students will have the chance to interact regularly with University professors and graduate students working in each of the six focal areas. The experiential learning approach will provide students with hands-on experience in the field. Academic curriculum will be brought to life at some of Northern Colorado's most exciting locations.

COLLABORATION.  
INNOVATION.  
CHANGE.

# We believe that sustainability is a conversation about a better world!

*We also believe you do not have to wait to make a difference...*

*(continued)*

## WHERE DOES IT TAKE PLACE?

The Program is based at the Colorado State University Fort Collins campus.

## FIELD TRIPS WILL VISIT:

- Rocky Mountain National Park
- Cache La Poudre River
- Short Grass Steppe Research Information Center
- CSU's Atmospheric Science Campus
- Old Town Fort Collins

## LIFE ON CAMPUS

Students will be immersed in a rich Rocky Mountain campus environment with access to recreational facilities and evening activities in Old Town Fort Collins. Students will be housed in Parmelee Hall at CSU, which has newly renovated, air-conditioned rooms that will provide them with a taste of college living. Who Should Join Us?

We encourage local and international students with a passion for the environment and an interest in sustainability to apply. This program will expose participants to a wide range of social, economic, and environmental perspectives on sustainability.

## THIS PROGRAM IS FOR YOU IF...

- You are creative
- You are interested in learning about ecosystems
- You want to provide solutions to complex problems
- You enjoy nature
- You want to develop leadership skills
- You are interested in working across disciplines
- You are a global thinker
- You want to learn new skills and have fun while doing it!

## WHO DO I CONTACT?

For additional information and questions about the Program, contact Stratis Giannakouros at [stratis.giannakouros@colostate.edu](mailto:stratis.giannakouros@colostate.edu). Or visit our website:
