

Summer Workshop for Teachers in Watersheds & Computer Modeling of the Hydrologic Cycle

A Professional Development Opportunity for Middle & High School Teachers

Are you a Middle School or High School teacher who wants to...

- learn about the movement of water through soils and watersheds?
- understand how mathematics and science content can support one another?
- experience inquiry instruction within the Earth sciences?
- see how computer models are used to understand and represent complex situations?
- realize how knowledge in the Earth sciences applies to everyday decisions made by citizens and landowners?
- meet local professionals working on water resources issues?

This four day hands-on workshop featuring a series of field exercises will take place on The Ohio State University campus from July 28-31. Teams of math and science teachers are encouraged to apply. Any teacher from the United States is encouraged to attend this program. Teachers will have a chance to interact with many geosciences professionals.

- Dates: Monday, July 28 to Thursday, July 31, 2014
- Times: 9 am to 4 pm
- Location: The Ohio State University Columbus Campus
- Application Deadline: June 3, 2014

Participating teachers will be expected to attend all four days and participate in activities and discussions. Teachers will be exposed to rigorous science content and interact with scientists and engineers. CEUs will be available.

Apply Online at <http://bprc.osu.edu/education/blog/watersheds/>

Please direct any questions to Jason Cervenec at cervenec.1@osu.edu or 614-688-0080.

This program is offered through a partnership between the Byrd Polar Research Center, Ohio State School of Earth Sciences, Ohio State College of Engineering, and the Ohio Supercomputing Center. Funding is provided by the National Science Foundation Award ID #1203035.
