

You are invited to...

Chemistry in Context

Fall 2014 Workshops

Are you new to or interested in learning about *Chemistry in Context*? Are you currently teaching with *Chemistry in Context* and would like to know more? In either case, this invitation is for you.

This fall, the American Chemical Society is hosting two workshops: September 26-27 in Washington, DC, and November 14-15 in Orlando, FL.

Please join us at either workshop to learn more about the new 8th edition of *Chemistry in Context*. Topics include:

- the features of *Chemistry in Context* that can engage your students
- an in-depth look at one chapter, The Air We Breathe (Chapter 1)
- the use of green chemistry and sustainability throughout the text
- the lab manual that accompanies *Chemistry in Context* and its new features
- hands-on experience with three laboratory investigations, including the new experiment “Extracting Limonene With Liquid CO₂”
- how to succeed (and fail) at using *Chemistry in Context*

Both workshops will address the same content over a period of one and a half days. There is no registration fee, and hotel for two nights and meals during the workshop are provided.

Please register for either workshop at:
