

Table of Contents

Preface	iii
1. Why Teach About Climate Change?	1
<i>by Don Duggan-Haas</i>	
Why Teaching About Climate Change Matters	
Science Learning, Its Application, and Politics	
We All Have Biases	
Systems and Scales	
Love and Beauty Will Persist	
Resources	
2. What Should Everyone Understand About Climate Change and Energy?	9
<i>by Don Duggan-Haas</i>	
What Do You Think?	
Collecting Expert Opinions	
Consensus Documents	
Striving for a Coherent Conceptual Framework	
Resources	
3. What is Climate?	27
<i>by Ingrid H. H. Zabel and Others</i>	
Climate is a System	
Measuring Climate	
Greenhouse Gases and Global Temperature	
Natural Causes of Climate Change	
Summary	
Resources	
4. Climate Change Through Earth History	53
<i>by Robert M. Ross and Others</i>	
Why Past Climate Change Matters	
Observing Climate Through Time in the Rock Record	
History of the Earth's Climate	
Climate Analogs and Models	
Resources	
5. Evidence For and Causes of Recent Climate Change	91
<i>by Ingrid H. H. Zabel and Others</i>	
Changing Temperatures and Carbon Dioxide	
Shrinking Ice Sheets and Glaciers	
Changing Sea Ice Extent	
Thawing Permafrost	
Rising Sea Level	
Causes of Recent Climate Change	
What are the Likely Effects of Climate Change Going to Be?	
Resources	

•	6. US Regional Climates, Current and Future.	107
•	<i>by Ingrid H. H. Zabel and Benjamin Brown-Steiner</i>	
•	Describing Climates	
•	Northeast	
•	Southeast	
•	Midwest	
•	South Central	
•	Northwest Central	
•	Southwest	
•	West	
•	Hawaii	
•	Alaska	
•	Resources	
•	7. Climate Change Mitigation	147
•	<i>by Ingrid H. H. Zabel</i>	
•	What is Mitigation?	
•	Mitigation Strategies	
•	Summary	
•	Resources	
•	8. Geoengineering	181
•	<i>by Ingrid H. H. Zabel</i>	
•	Counteracting Climate Change	
•	Examples of Carbon Dioxide Removal (CDR) Techniques	
•	Examples of Solar Radiation Management (SRM) Techniques	
•	Geoengineering Choices	
•	Resources	
•	9. Climate Change Adaptation	193
•	<i>by Ingrid H. H. Zabel</i>	
•	How Much Does Adaptation Cost?	
•	Types of Adaptation Strategies	
•	Adaptation to Different Climate Hazards	
•	Equity and Social Justice Considerations	
•	Resources	
•	10. Obstacles to Addressing Climate Change	213
•	<i>by Don Duggan-Haas</i>	
•	Controversial Issues and Complex Systems	
•	Creating Meaningful Dialog	
•	Factors That Influence How We think	
•	How Do People Change Their Minds?	
•	How Can We Envision New Systems?	
•	Resources	
•	11. Perspective	223
•	<i>by Don Duggan-Haas</i>	
•	Apocalyptic Tales of Climate Change	
•	Use of Language and Perspective in Teaching Climate Change	
•	Hope and Optimism	
•	Apocalyptic Prophecies Versus Predictions of Climate Change	
•	Reality Check: A Personal Perspective	
•	Science Teaching Toward a Sustainable World	
•	Resources	

12. Frequently Asked Questions	233
<i>by Alexandra F. Moore and Others</i>	
Glossary	249
Acknowledgments	275
Figure Credits	277

Contributors

From the Paleontological Research Institution, Ithaca, NY:

Don Duggan-Haas
Alexandra F. Moore
Robert M. Ross
Ingrid H. H. Zabel

From the Center for Global Change Science, Massachusetts Institute of Technology, Cambridge, MA:

Benjamin Brown-Steiner
